

# SK-OV-3 [SKOV-3; SKOV3]

## 品系基本信息

|       |                                                                                                                                                                                 |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 目录号   | NM-RC03                                                                                                                                                                         |
| 细胞系名称 | SK-OV-3 [SKOV-3; SKOV3]                                                                                                                                                         |
| 品系状态  | 成瘤性验证完成                                                                                                                                                                         |
| 品系描述  | SK-OV-3是来源于人卵巢癌细胞系，在Balb/c nude小鼠皮下接种后，能正常成瘤。<br>*使用本品系发表的文献需注明: SK-OV-3 [SKOV-3; SKOV3] cell line (Cat. NO. NM-RC03) was purchased from Shanghai Model Organisms Center, Inc.. |

## 验证数据
