

# R26-loxP-tdTomato-loxP-DTA

|      |                                                                                                 |
|------|-------------------------------------------------------------------------------------------------|
| 品系全名 | C57BL/6Smoc- <i>Gt(ROSA)26Sor</i> <sup>tm(SA-loxP-tdTomato-PGK-Neo-3xpA-loxP-DTA-pA)1Smoc</sup> |
| 目录号  | NM-KI-225003                                                                                    |
| 品系状态 | 活体                                                                                              |

## 基因信息

|                             |            |                                                      |
|-----------------------------|------------|------------------------------------------------------|
| 基因名<br><b>Gt(ROSA)26Sor</b> | 基因曾用名      | R26, ROSA26, AV258896, Gtrge26, Gtrosa26, Thumpd3as1 |
|                             | NCBI ID    | <a href="#">14910</a>                                |
|                             | MGI ID     | <a href="#">104735</a>                               |
|                             | Ensembl ID | <a href="#">ENSMUSG00000086429</a>                   |

## 品系描述

将 SA-loxP-tdTomato-PGK-Neo-3xpA-loxP-DTA-pA插入到小鼠Rosa26基因中。

\*使用本品系发表的文献需注明: R26-loxP-tdTomato-loxP-DTA mice (Cat. NO. NM-KI-225003) were purchased from Shanghai Model Organisms Center, Inc..

## 验证数据
