

# Lum-Flox

---

品系全名	C57BL/6Smoc- <i>Lum</i> <sup>em1(flox)Smoc</sup>
目录号	TBD
品系状态	在研

---

## 基因信息

### 品系描述

These mice carry loxP sites flanking target exons of Lum gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Lum gene.

\*使用本品系发表的文献需注明: Lum-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..
